## About This Game

Experience an unmatched level of realism as you step in front of a 100mph slap shot, dive to defend a tip-in and steal a save glove-high.

Whether you just want to feel the excitement of goaltending or you are a goalie who wants to make the most of his or her off-ice training NetStars delivers.

More than just a game, NetStars was developed to be a training tool to help goalies with proper goaltending techniques through realistic play action, real-time performance indicators and detailed feedback.

NetStars stresses core goaltending techniques by tracking and scoring the entire play cycle including setting up for the shot, reacting to the shot and following through after the save. The result is a skills-based scoring game that facilitates and rewards best practices through realtime feedback in a realistic play setting.

**Feel the thrill of being a goalie** – Catch, stop and block shots in this fun VR goalie game.

**Progressive Scoring System** – Focused on key goalie fundamentals including angle alignment, depth positioning, save location, reaction quickness, rebound and recovery.

**Realtime Visual Indicators** – Continuous reinforcement of best practices and key goalie fundamentals.

**3D Motion-Captured** – True-to-life puck physics and skater animation combined with AI-based plays.

---

**From Pond to Pro** – Play a wide variety of rink environments, practice drills and player types.

**Drill Data** – Understand where your goalie game is strong and where it's falling short.

**Full Body Tracking** – With HTC Vive Trackers you can bring your legs into play too.

Title: NetStars - VR Goalie Trainer

Genre: Sports

Developer:

Josh Beatty, Mike Casto

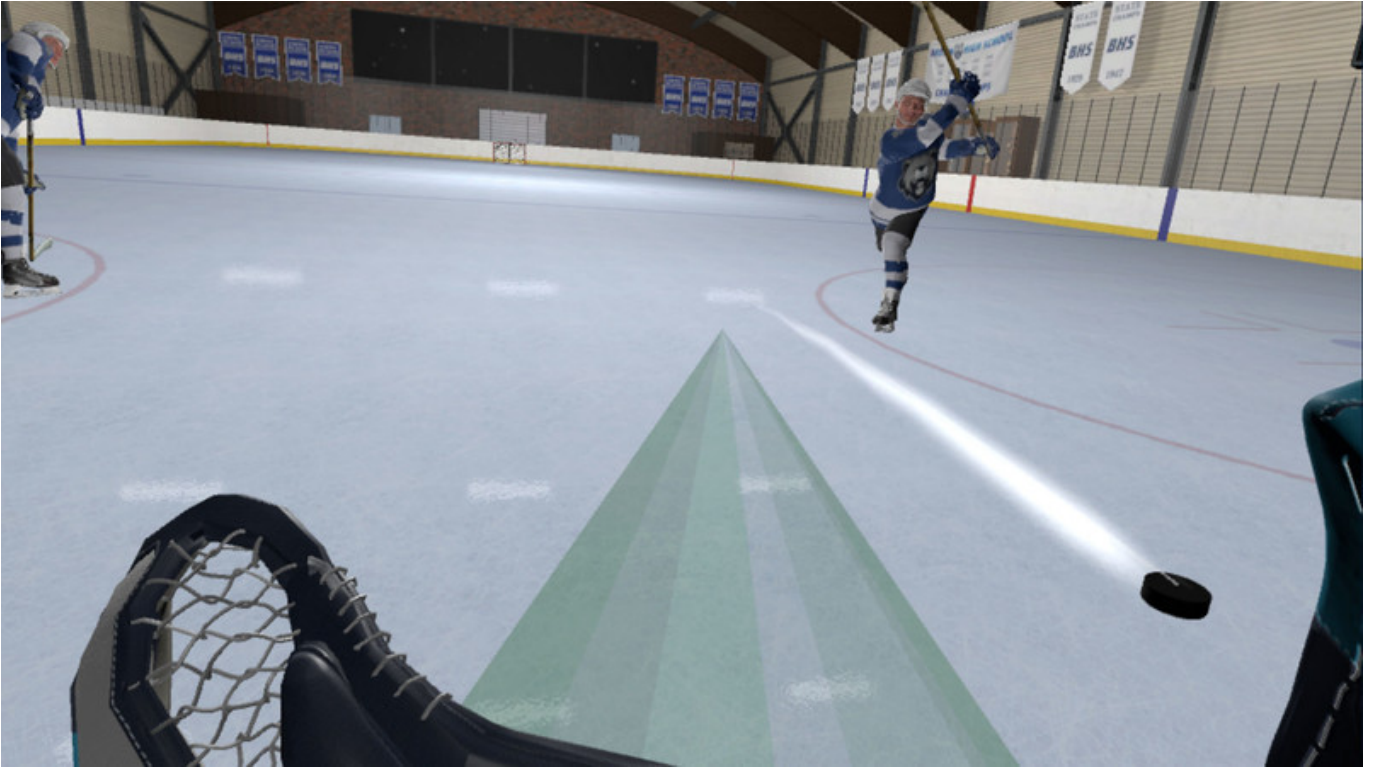

Publisher:

Anchor Reality

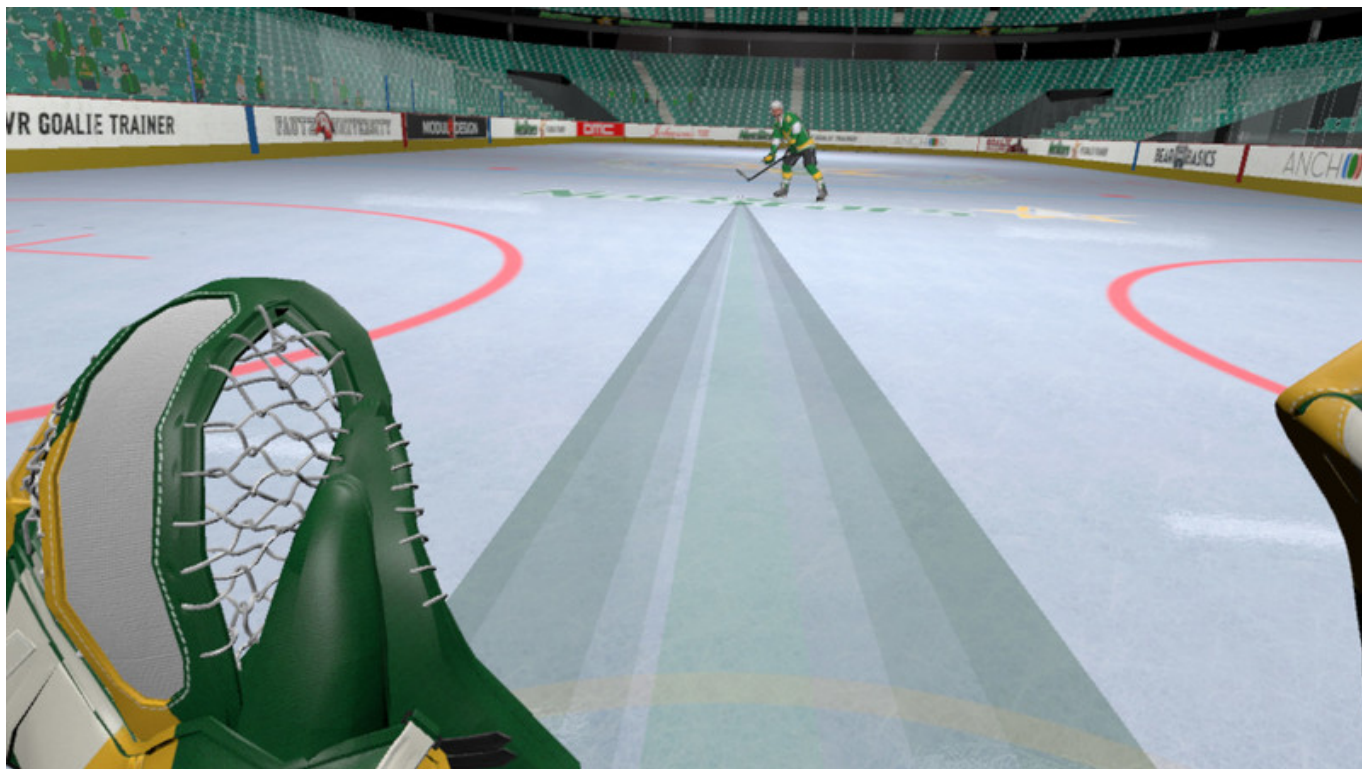

Release Date: 29 Mar, 2018

b4d347fde0

English

---

Game has a lot of issues. Puck bounces weirdly and not realistically. Chest shots that hit center still bounce oddly into corners or into goal. Pucks deflected behind the net still get a negative bonus for rebound. Picking up or dropping the puck while the score is shown changes the score based on rebound. Players will sometimes disappear and re-appear with a shot. Sometimes the puck goes through your equipment. When multiple players, you have no idea who is starting with the puck and sometimes they shoot right off the draw, so you have no chance to really know there is even a shot coming. The free goalie game out there is better than this one.
